Housekeeping Training Step Guide

BHH-HK-02 · Version 2.0 · 12 November 2026 · Replaces BHH-HK-02 version 1.0 and BHH-HK-02a. Read with policy BHH-HK-01, then complete the online course (QR code on page 2).

1. The 5-step loop — every room, every time

1 Assign	2 Clean	3 Check	4 Report	5 Release
Know your rooms: departure, stay-over or priority	Right product, right cloth, set order	Supervisor inspects the room	Every fault, before release	Only then: Clean and Ready

2. Colour-coded microfibre cloths

Cloth	Use for
Red / pink	Toilets and WCs only — never anywhere else
Orange	Bathrooms: basins, bathtubs, tiles and shower screens
Blue	Wet cleaning of mirrors, with the glass spray
Green	Buffing mirrors dry to remove smudges and residue
Yellow	Dusting bedroom surfaces and furniture
Tea towel	Clean, designated tea towels only — for washing and drying tea and coffee cups

Never use guest towels, pillowcases or linen as cloths. Replace used or heavily soiled cloths with clean ones.

3. Our products — right product for the job

Job	Product	Cloth / how
Bathroom surfaces and floor	Ecolab Diesin Max	Orange cloth; mop for floor
Mirrors and glass	Ecolab Pro Glass or Sysco Glass and Surface Spray	Blue to clean, green to buff
Toilets and WCs	Ecolab or Sysco Toilet Cleaner	Red / pink cloth only
Mould on sealant or grout	Ecolab Mould Ex or Topclin Mould Remover	Window open; gloves and eye protection
Limescale and tarnish on chrome	Descaler (tarnish remover)	Orange cloth; rinse well
Tea and coffee cups	Fairy Liquid at the designated sink	Clean designated tea towel
Air freshener	Ecolab Pro White Cotton or Sysco Keystone	Light spray into the air, after cleaning
Bleach	Brakes Bleach	Only when your supervisor says

NEVER MIX CHEMICALS. Bleach, Mould Ex and Topclin must never meet a toilet cleaner or the descaler — they can give off a poisonous gas. One product at a time, rinse with water in between. Strong smell or feeling dizzy? Leave, close the door, tell your supervisor.

Gloves always. Eye protection for mould remover, bleach and descaler. Read the label; use the dose on the label. Close and secure every chemical and storage cupboard door after use.

4. Departure clean — 12 steps in order

Top to bottom, dry to wet, clean to dirty. Toilet last, vacuum last. Guide time 30 to 35 minutes.

Step	What to do	Product / cloth
1 Enter, look	Knock, announce twice. Lights on, curtains and window open.	—
2 Strip the bed	Shake linen for items; check the mattress. Straight into the laundry bag.	—
3 Rubbish and cups	Empty bins, new liners. Used cups and glasses to the trolley.	—
4 Apply products	Toilet cleaner in the toilet; Diesin Max on basin, bath, screen.	Toilet cleaner, Diesin Max
5 Make the bed	Wash hands, fresh gloves. Clean linen never on the floor. Tight corners.	—
6 Dust	All bedroom surfaces and furniture, top to bottom.	Yellow
7 High-touch	Remote, phone, switches, handles, kettle, controls — check they work.	Yellow, approved spray
8 Cups and tray	Wash at the designated sink, dry, restock the tray.	Fairy Liquid, tea towel
9 Bathroom	Basin, bath, tiles, screen, no hair. Mirror: clean, buff. Toilet last. Mop.	Orange; blue then green; red / pink
10 Replenish	Towels, toilet roll, amenities, clean glasses.	—
11 Vacuum	Far corner back to the door, including under the bed.	—
12 Final check	Window shut, safe open. 5-second look. Report faults and lost property.	—

5. Stay-overs, hygiene and linen

- Stay-overs: never move, open or throw away the guest's belongings. Replace only towels left on the floor or in the bath.
- Change gloves and wash or sanitise hands between tasks — always after the toilet, before the bed, linen or cups.
- Clean and dirty linen kept apart. Linen that touches the floor goes to the laundry and is replaced.
- Cups are never washed in the guest basin.

6. Report it — and speak up

- Report every fault to maintenance with the room number before the room is released. Unsafe? Keep the room closed.
- Follow the hotel procedure, not personal habits. See a wrong practice? If safe, politely stop it and tell your supervisor.

Now complete the online course: Housekeeping standards — COSHH, hygiene and room cleaning

Scan the QR code or go to **brandon.hospro.co.uk/housekeeping** · staff code **999** · about 25 minutes · pass mark 16 out of 20.
